

## Final Examination Information

- The final exam will be on Friday, 14 December 2012, from 12:00-1:50pm.
- The exam will be cumulative, covering topics from throughout the semester.
- Unlike the midterm, this exam will be entirely **closed book** and **closed notes**.
- Unlike the homework questions, we are often very open-ended and require a great deal of thought and time to digest, the exam questions should be more rote, expecting you to demonstrate more basic comprehension of the fundamental problems, algorithms and analyses that we have seen.
